

LANGOFLEX

EMI-HV

LANGOFLEX EMI-HV is a braided expandable sleeving & electromagnetic protection for electrical wires, made of tinned copper and PET multifilament yarns. Its construction provides an excellent shielding effectiveness and avoids the propagation of magnetic fields disturbing the surrounding electronics.

PRODUCT FAMILY: EMI Sleeving

CONSTRUCTION & MATERIALS: Braided PET multifilament & tinned copper

STANDARD COLORS: Orange

TEMPERATURE OF USE: -40/150°C (-40/302°F)

TYPICAL APPLICATIONS:

- Automation & Robotics
- Agricultural equipment
- Construction engines
