

NU-SHIELD

FG2A

NU-SHIELD FG2A is a lightweight heat shield made of fiberglass woven laminated with an aluminized foil with an adhesive offering an excellent adhesion on many surfaces. It is used in high temperature environments to reflect radiant heat away from components. This protector is a 100% customized solution that can be cut in any complex shapes.

PRODUCT FAMILY: Heat Shields

CONSTRUCTION & MATERIALS: Woven fiberglass with aluminized foil lamination and sensitive adhesive

STANDARD COLORS: Silver

TEMPERATURE OF USE: -40/175°C (-40/347°F)

TYPICAL APPLICATIONS:

- Appliances
- Cooling / Heating Equipment
- Recreational Vehicles
- Trucks & Transportation
