

NU-SHIELD

NW

NU-SHIELD NW is made of non-woven carbon fibers laminated with an aluminized foil fiberglass reinforced. It is specially made for high temperature applications up to 250°C in harsh environments to reflect radiant heat away from components and the fabric material adds an insulating thermal protection layer.

PRODUCT FAMILY: Heat Shields

CONSTRUCTION & MATERIALS: Non-woven carbon fiber & aluminized foil fiberglass reinforced

STANDARD COLORS: Silver

TEMPERATURE OF USE: -40/250°C (-40/482°F)

TYPICAL APPLICATIONS:

- Appliances
- Cooling / Heating Equipment
- Recreational Vehicles
- Trucks & Transportation
